RainbowCORE and Greasemonkey Install Guide

Important Note: This Guide is only for installing for the first time. If upgrading versions, find the Upgrade Guide

Greasemonkey
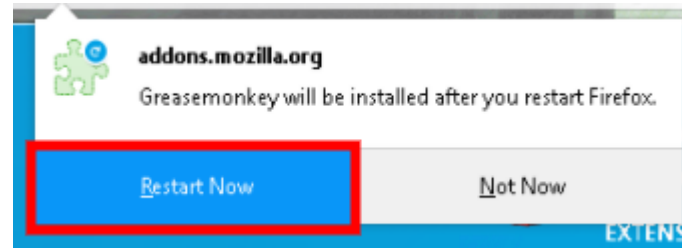

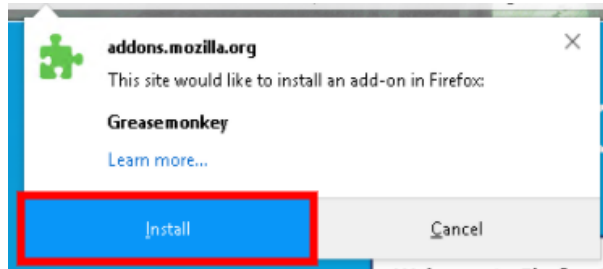

What is it and why do I need it?

Greasemonkey is a Firefox Plugin that allows RainbowCORE to do its magic. It's a plugin that allows you to customize the way a web page displays or behaves, using JavaScript.

### How to install Greasemonkey - https://addons.mozilla.org/en-US/firefox/addon/greasemonkey/

1. Go to this link and click "Add to Firefox".

2. Then click "Install" and "Restart" when prompted

3. Once it's installed and browser restarted, you should see a small Monkey in your extensions
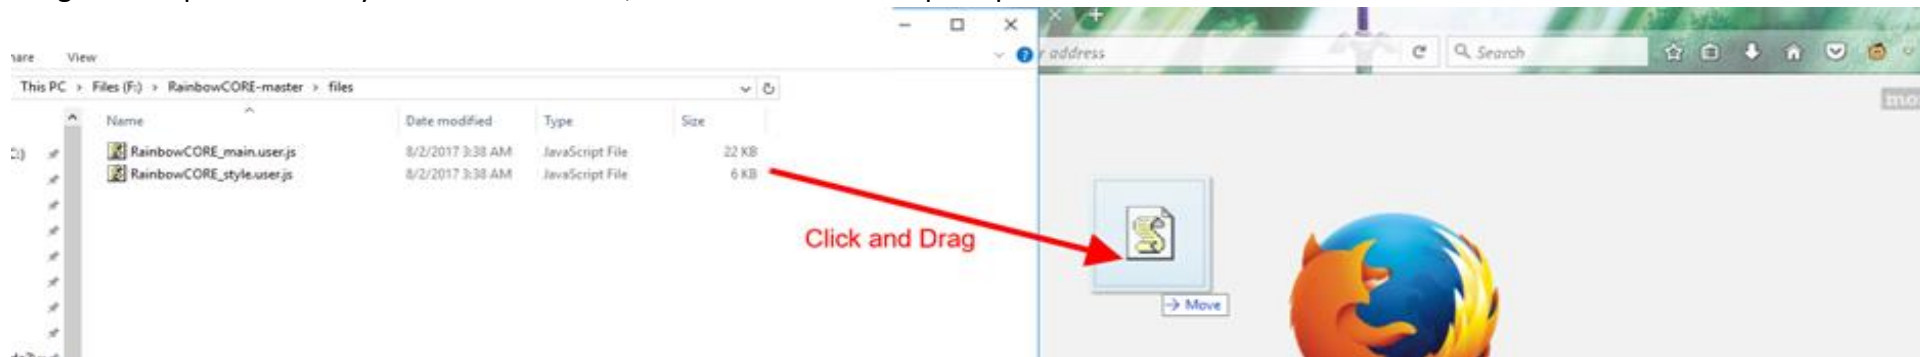

RainbowCORE

How to Install RainbowCORE
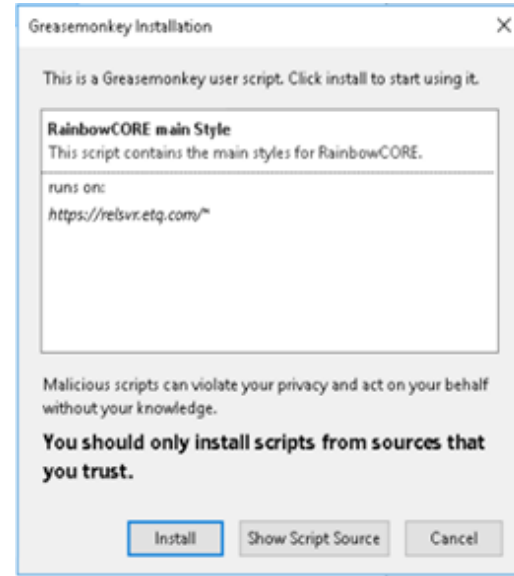

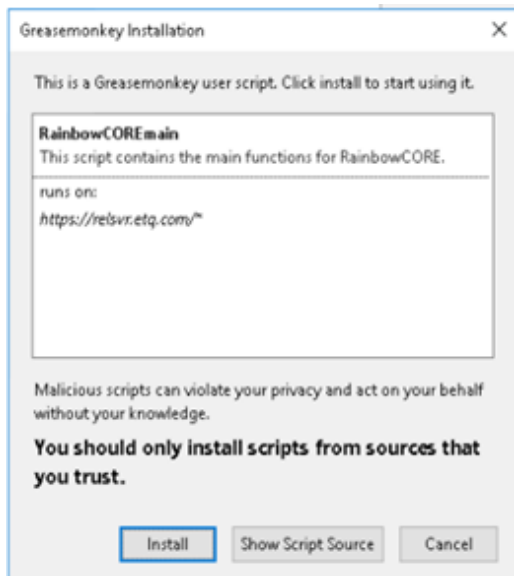

Before installing ensure that you have the Greasemonkey extension installed. There is no way to install RainbowCORE without it.

1. Go to https://github.com/MarcusNTuttle/RainbowCORE/releases
2. Download and extract the *RainbowCORE_X.X.zip*

3. Drag and Drop each file to your Firefox window, and click install when prompted

RainbowCORE is now installed! – For usage, please see the RainbowCORE Usage Guide (coming soon)
